Electrical Construction

FOCUSED CAPABILITIES

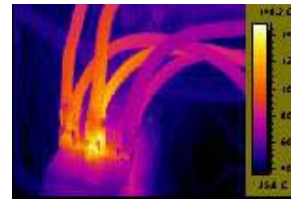

- **Specializing in Industrial and Commercial Installations and Renovations**
- **MSHAW Certified Technicians**
- **Power Factor and Power Quality Analysis; Correction Services and Consulting**
- **Complete Turnkey Systems, Engineering, Commissioning and Maintenance Services**

READING ELECTRIC, a leading supplier of electro-mechanical equipment, services, and problem solver for Industrial and Commercial customers for over 50 years, continues to expand their Electrical Construction Services.

READING ELECTRIC has extensive experience in Industrial and Commercial equipment installations and renovations:

HVAC Systems
 Switch Gear
 Frequency Drives
 High Voltage

Lighting Systems
 Motor Controls / PLCs
 Security Systems
 Underground Cabling

Transformers / Substations
 Electrical Grounding
 Back-Up Electrical Power

The Technical Staff includes certified Master and Journeymen Electricians, who employ the latest technologies in Thermography and Electrical Test Instruments to complete the most difficult **turnkey projects from project conception through commissioning in compliance with these standards: NEC, UL, NFPA, ANSI, MSHA, OSHA and TIA.**

READING ELECTRIC has the expertise on Staff to analyze your Power Factor and effect the necessary capacitance correction to ensure compliance with the local Utility's energy requirements. READING ELECTRIC provides a no cost Utility Bill Analysis to its customers, and has the technical expertise to analyze your Power Quality for high levels of system harmonics, sags and/or spikes in the line voltage. If problems exist, a turnkey engineered solution can be provided to ensure system uptime and reliability.

READING ELECTRIC specializes in Open Mining equipment installation and repairs, offering around the clock emergency service. READING ELECTRIC's Staff of engineers and technicians are also Pennsylvania State Certified for government-funded projects in Education Institutions, Hospitals and other government facilities.
